### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

This application is in condition for allowance except for the presence of claims 24-49 to the invention non-elected without traverse. Accordingly, claims 24-49 been cancelled.

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: Claims are allowed in view the unexpected improvement of the results shown on pages 102-103, Table XIV wherein the inventive sample 8-1 that contains the combination of the Gold compound and the diphenylphosphine sulfide claimed in the present invention shows a significant improvement of speed over the comparative sample that contains a combination triphenylphosphine sulfide compound known in Riester in column 7, compound 50 with same gold compound used in the inventive sample. The 49 % improvement of photographic speed (SP-2) would have been found significant and unexpected by the worker of ordinary skill in the art. Riester et al discloses both triphenylphosphine sulfide and diphenylphosphine sulfide for use in a photothermographic material, but fail to recognize the advantage of the diphenylphosphine sulfide over the triphenylphosphine sulfide when used photothermographic material. Accordingly, the results shown in the specification disclosure shown on pages 102-103, Table XIV obviates any rejection

under 35 USC 103(a) set forth in the office action of record, and the claims are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
